Cotality (CoreLogic) Home Value Index, September 2026 (released 1 Oct 2026) + SQM Research rental and listings data (September 2026). A year ago homes in the capitals took 23 days to sell.

The suburb figure covers a past period; the city figure is this month. Read them together: the suburb figure tells you where Ridgehaven has been, the month tells you which way the city is heading now.

03 What your home is worth

A median is the whole suburb. Your home is one house: its block, its condition, its street and the buyers looking right now. The only way to know what it would sell for is to look at it against the sales that actually compare.

That is what a free appraisal is for. A real number, the evidence behind it, and no obligation to sell.
